Error Notice Identification Number: __RAD-303-03_____   Page __1__ of __1___
Software Name: ___ITSC RADTRAD 3.03_ _____
Versions Affected: ____Revisions 0 & 1_____
Error Classification: _X_ Safety-Related ___ Non Safety-Related

Description of Error:
When a user runs the GUI version throughthe acceptance test case sequence, some results are different from those calculated by the batch version. For example test case 14 after test case 13 will have additional time periods edited, dose results are not effected.

Recommendations to Program Users:
The error does not impact code results. If the user feels that this may be a problem they should run the case separately to determine the correct answer, i.e. initiate the RADTRAD GUI, bring in the input, and calculate.

Software Program Manager: __Jack Dallman_____   _____   _____
                                             Printed/typed Name   Signature   Date
